

Talking About Technology

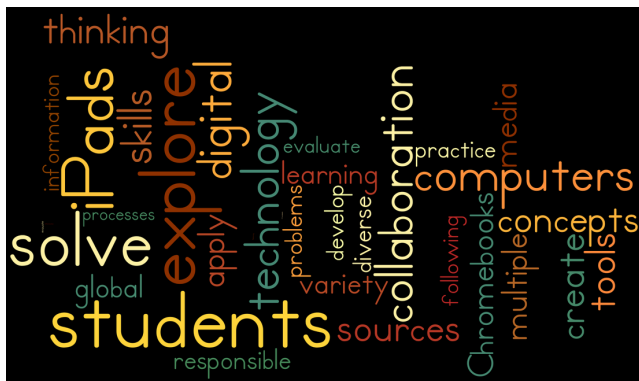

A Newsletter for D70 Parents

By Pam Imholz, Director of Technology

Spring 2014

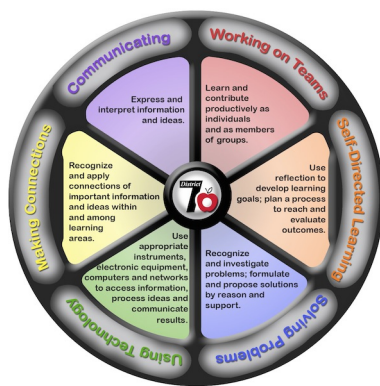

New Technology Website

Please visit the new website dedicated to sharing lists of technology projects that are occurring in classrooms across the district. Some sample projects will be linked as well for you to enjoy. Please click the image below or go to <http://d70tech.weebly.com>

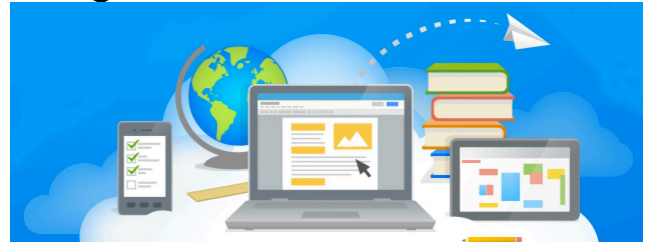

Applications of Learning

“Through the Applications of Learning, students demonstrate and deepen their understanding of basic knowledge and skills. These applied learning skills cross academic disciplines and reinforce the important learning of the disciplines. The ability to use these skills will greatly influence students’ success in school, in the workplace and in the community.” Technology lessons often contain multiple elements from the Applications of Learning wheel.

Google Apps for Education

The District will expand Google Apps for Education to include 4th grade next year.

Summer Tech Resources

Although this District 70 page is undergoing a design change, check in here for resources for students to connect with over the summer. Have a relaxing and safe summer!
